

10 July 1957

**MEMORANDUM FOR:** The Inspector General

**THROUGH:** Deputy Director/Intelligence

**SUBJECT:** IG Staff Report on Visit to OBI

**REFERENCE:** Memo from Executive Assistant to DD/I  
to AD/BI, subject: Unannounced Spot  
Checks on Agency Components by  
IG Staff, dated 9 July 1957

26

1. Reference memorandum contains the following quotation from an IG staff report on a recent visit to this Office:

25X1A1a "One factor which should be reviewed is OBI's subsidy of the Board on Geographic Names. This is a component of the Interior Department for which Congress has refused to provide funds. It consists of 85 people and costs the Agency [REDACTED] annually. It produces gazetteers for which there is acknowledged need. However, the hazard of supporting with Agency funds a unit which Congress deems unworthy of support should be reconsidered."

2. I am concerned about the implications of the last sentence of this quoted report. The subject was not discussed during the visit of the IG staff member, nor has this Office ever considered the budgetary support of BGN in this light. It is a matter of record that Congress has not seen fit in recent years to appropriate funds directly to the Department of the Interior for this work. This is not to infer, however, that Congress deems the BGN, nor its supporting staff in the Office of Geography, unworthy of support.

3. The enabling act of the present BGN stems from Public Law 242 of the 80th Congress, approved 25 July 1947. The following quotation from the Senate report on the bill (S. 1262) which led to the Act seems to reflect the intent of the Congress in this respect:

"In recent years the desirability of obtaining permanent legislative authorization for the geographic-names work has been suggested by the Appropriations Committee of both House and Senate, and the enactment of S. 1262 would provide the requisite statutory basis for the continuance of a program which the Congress has considered worthy of support for more than 25 years, and would eliminate the possibility of a point of order being made and sustained against a future appropriation item for this activity."

4. The Bureau of the Budget and the pertinent Appropriations Subcommittees of the Congress are fully aware that CIA's budget has been carrying the major support for the Office of Geography, Department of the Interior, since the inception of the NIS Program. The Director, Office of Geography, has repeatedly sought budgetary support from the Department, but this has been denied by the Secretary of the Interior, so that Interior's budget goes to the Congress without request for these funds.

5. The CIA's position is clear and legal. We needed worldwide geographic name standardization in support of the NIS Program. BGN is designated by the Congress "to provide a central authority for standardizing geographic names for the purpose of eliminating duplication in standardizing such names among the Federal departments, and for other purposes." Therefore, OBI utilized BGN for this purpose and assumed, as a service of common concern, the financial support of geographic-names standardization in the form of NIS Gazetteers. This has become a valuable intelligence service that will need to be continued through CIA budget support, if it is to be done at all, until the Department of the Interior obtains direct Congressional appropriations for this work.

9 July 1957

MEMORANDUM FOR: Assistant Director for Basic Intelligence

SUBJECT : Unannounced Spot Checks of Agency Components  
by IG Staff

1. On 30 April 1957 members of the IG Staff again made unannounced visits to various parts of the Agency to pay courtesy calls, discuss general problems and follow up previously identified trouble spots.

2. There is quoted below, for your information, a brief summary of the results of the visit to your Office:

"a. This recently formed component has not yet been inspected formally the IG Staff as a separate unit. However, its activities were examined in 1954 when it was still a division of ORR. It has a total personnel strength of 76 plus 452 full-time employees of other agencies whose salaries are being paid by the Agency.

"b. The NIS program is completing its ninth year. Coverage of the Sino-Soviet Bloc is complete and similar coverage is essentially complete for Western Europe, and the Near and Far East. Africa has the least coverage but is being given a higher priority.

"c. One factor which should be reviewed is OBI's subsidy of the Board of Geographic Names. This is a component of the Interior Department for which Congress has refused to provide funds. It consists of 85 people and costs the Agency [REDACTED] annually. It produces gazetteers for which there is an acknowledged need. However, the hazard of supporting with Agency funds a unit which Congress deems unworthy of support should be reconsidered."
